Seperate nav for each piece that smooth scrolls to id

# Create with React.JS, React Router and Bootstrap

6 portfolio pieces

Design into pdf first, so i can send it to topal, and then start building it out on the website.

Create nav that directs to id in div html smooth scroll implementation.

HOME PAGE

Put in carosel with images/videos etc.

Maybe previews of portfolio pieces or cool pictures that has contact button that directs to contact page or work page.

First page demo
